HEAT PIPES

Assistant Commissioner
for Patents
Washington, D.C. 20231

Dear Sir:

LETTER TRANSMITTING MODIFIED FORM PTO-1449

This will acknowledge receipt of the PTO communication mailed May 10, 2001. For reasons discussed in more detail below, and at the request of Supervisor Primary Examiner Lazarus, a modified version of a previously-filed Form PTO-1449 is enclosed.

More specifically, the communication mailed May 10, 2001 asserted that Applicants' Letter filed April 20, 2001 was non-responsive, and was an attempt to delay prosecution of the application. Applicants disagree. MPEP 609 specifies that, when information has been submitted in compliance with 37 C.F.R. §§ 1.97 and 1.98, "the examiner has an obligation to consider the information". Applicants submitted various documents in a manner complying with Rules 97 and 98, and the Examiner did not fulfill the "obligation to consider the information" prior to issuance of the Office Action. As one

2

example, Applicants submitted a document in the English language in a manner complying with Rules 97 and 98, and the Examiner refused to consider it on the ground that it was not in English. Thus, Applicants were not delaying prosecution, but merely asking that the examiner fulfill the "obligation to consider the information". The undersigned therefore decided to discuss this matter by telephone with the Examiner, and this will make of record related telephone conversations with Examiner Atkinson and Examiner Lazarus.

More specifically, the undersigned discussed this matter by telephone with Examiner Atkinson on May 16, 2001. This conversation did not result in resolution of the issue, and the undersigned therefore discussed the matter by telephone with Supervisory Examiner Lazarus. Examiner Lazarus asked for an opportunity to review the file and to discuss the matter with Examiner Atkinson.

Examiner Lazarus subsequently telephoned the undersigned back on May 22, 2001, and agreed that there were certain references which should have been considered. He requested that Applicants submit by facsimile a modified version of a previously-filed Form PTO-1449, asked that Applicants correct a typographical error in a patent number on that form, and asked with respect to three other documents that Applicants either provide additional information or indicate that certain elements of information were "unknown". Examiner Lazarus requested that this facsimile be filed by May 25, 2001, and indicated that the Patent Office would thereafter consider the documents listed on that modified Form PTO-1449, and then issue a further communication which would be accompanied by an initialed copy of that Form PTO-1449, and which would restart the period for a response.

Applicants do not concede that, aside from a typographical error, there were any defects in the previously-

3

filed Form PTO-1449. However, Applicants are willing to comply with the request of Examiner Lazarus in order to expedite examination of the present application. According, this Letter is being filed by facsimile, using a facsimile number specified by Examiner Lazarus, and is accompanied by the modified Form PTO-1449 requested by Examiner Lazarus. On the second page of this Form PTO-1449, a typographical error has been corrected in the patent number for Nemes U.S. Patent No. 5,225,964. Further, as to each of the three documents listed under the "Non-Patent Documents" heading on this same page, Applicants have supplied additional information and/or identified certain information as "unknown". The enclosed Form PTO-1449 is believed to address each facet of Examiner Lazarus' request. According, it is respectfully requested that all of the items listed on this modified Form PTO-1449 be considered on the merits, and that Applicants be sent a communication which is accompanied by an initialed copy of the modified Form PTO-1449, and which restarts the period for a response.

Respectfully submitted,
BAKER BOTTS L.L.P.
